

Cleveland Community College Site, Cleveland County

137 South Post Road, Shelby, NC

Current Programs: EdS Higher Education, MA Elementary Education, MA Higher Education

Appalachian State University currently delivers the programs listed above to enrolled students in the state-of-the-art LeGrand Center on the campus of Cleveland Community College at 137 South Post Road, Shelby, NC. The campus is located in central Shelby, North Carolina and is in close proximity to I-85 which is convenient for students. Student parking is directly in front of the center and is adequate and well-lit. The 89,000 square foot center, opened in August 2012, was designed to meet LEED Silver Certification and thus utilizes modern, energy-efficient materials, natural lighting and cutting-edge conference technology. The classrooms feature advanced conference technology and audio-visual capabilities to support the degree programs of the type offered by Appalachian State.

Physical description of classrooms: The classrooms assigned to Appalachian courses are 6109 and 6112. They feature adult furniture that is moveable and can be configured to meet any need that arises as part an instructional class. It is well-lit and attractive (see images below). Space usage, administrative support and technical support are governed by the Appalachian Learning Alliance Agreement. Financial considerations are governed by the UNC-NCCCS Space Usage Agreement.

Technology in Rooms 6109 & 6112:

- Instructor PC with Windows 7 Professional equipped with a Cisco Softphone.
- Smart board with smart projector that supports multiple devices.
- Crestron lighting that allows instructor to program lighting scenes that are best suited for the class.
- Crestron processor and switch which allows the instructor to send multiple forms of content to the Smartboard such as; Instructor PC, DVD/VCR, Laptop, Iphone, Ipad, etc...
- Crestron touch panel that allows instructor to easily switch between multiple content, raise and lower blinds, control room temperature, dim and brighten room lights.
- Laptops with Windows 7 professional available for each student.
- DVD/VCR.
- Gigabyte speed wireless internet access for instructors and students.
-

Alternate Classroom Space: Should the need arise for alternate classroom space, classroom 3211 in the Paksoy Technology Center will be scheduled. The room is equipped with an interactive SmartBoard as well as a regular white board. The instructor podium contains a PC, document camera, DVD/VCR player, and VGA and sound connections for a laptop. All media devices are accessible through an Extron AV control

system; visual output is displayed via a ceiling mounted data projector, and audio is provided with surface mounted speakers. The instructor PC has hardwired network access, Microsoft Office, and multiple internet browsers with add-ons. Wireless access is available for student mobile devices and wall and floor outlets provide easy access for charging devices.
